ONLINE

SUMMER
SCHOOL 2022

The Centre for Environmental Management, at the University of the Free State, South Africa and the Technische Universität Dresden, Germany invite you to participate in our Online Summer School on freshwater monitoring and management:

Managing surface water quality: General framework, tools and implementing disaster management aspects in urban areas

Funded by
The VolkswagenStiftung

Communities rely on water resources for their health, well-being and economic development. However, surface water pollution and extreme climate events linked to climate change, threatens health, livelihoods and food security. There is an urgent need to monitor and manage water resources more effectively, and to reduce the risks associated with climate change.

Join us online for a vibrant week long Summer School addressing the important issues of monitoring and managing surface water quality. Presenters are from Germany and South Africa, representing academia, industry and non-governmental organizations. Use this opportunity to build your personal network with upcoming and established professionals in the field of surface water management!

Important Information:

When?	24 to 28 January 2022
Where?	Online platform
Programme?	A full programme is available on the Summer School website
Participation costs?	A subsidized fee of R1000 for participants from Government and Industry 25 bursaries available for full-time registered postgraduate students
