Chemistry Satellite Symposium **Kyoto University: Sept. 5-6, 2018**

## **From Molecules to Materials**

*Organized by:*

Stefan Kaskel (TU Dresden), Jan Weigand (TU Dresden), Qiang Xu (AIST-Kyoto University ChEM-OIL)

**Venue: 2<sup>nd</sup> floor meeting room, iCeMS Main Building, Yoshida-Ushinomiya-cho, Sakyo-ku, Kyoto** [One-minute walk from KyodaiSeimon-mae Stop (Kyoto City Bus)]

[www.icems.kyoto-u.ac.jp/en/access/](http://www.icems.kyoto-u.ac.jp/en/access/)

**Scope:**

Progress in science significantly benefits from interdisciplinary and international collaboration and networking. The satellite symposium brings together Japanese and German scientists from all chemical disciplines to encourage cooperation and exchange through minds. From synthesis to function, whether molecules or materials are involved, chemical science will further continue to unravel novel phenomena and provide solutions for a sustainable society.

**Topics:**

- Molecular Chemistry, Supramolecular Chemistry, Solid State Chemistry, Physical Chemistry, Nanochemistry, Catalysis, Energy Materials, Chemical Engineering, Separation, Environmental Chemistry, Resource Sustainability

The Symposium is part of the

**Second Interdisciplinary and Research Alumni Symposium iJaDe2018**

**SEPTEMBER 3RD TO 7TH | KOBE, JAPAN**
