Titel: Data avalanche from DNA microarrays

Referent: Dr. Uwe Hobohm
F. Hoffmann-La Roche Ltd.,
Bioinformatik, Basel

Kurzfassung:

DNA microarrays ("chips") have been introduced some years ago along with large hype in pharma industry that diagnostic and understanding of diseases will be drastically facilitated by parallel monitoring the expression of thousands of genes. In the meantime it is recognized that the technology started with many unresolved issues on hardware and software side. Some of those will be adressed.

Ort: Willers-Bau B321

Zeit: Donnerstag, den 28. Februar 2002, 14.00 Uhr

gez. Prof. Dr. W.E. Nagel
